In addition, the lead agency must ensure that informed clinical opinion may be used as an independent basis to establish a child's eligibility under this part even when other instruments do not establish eligibility; however, in no event may informed clinical opinion be used to negate the results of evaluation instruments used to establish eligibility under paragraph (b) of this section.

(4) All evaluations and assessments of the child and family must be conducted by qualified personnel, in a nondiscriminatory manner, and selected and administered so as not to be racially or culturally discriminatory.

The family-directed assessment must – <ul style="list-style-type: none"> (i) Be voluntary on the part of each family member participating in the assessment; (ii) Be based on information obtained through an assessment tool and also through an interview with those family members who elect to participate in the assessment; and (iii) Include the family’s description of its resources, priorities, and concerns related to enhancing the child’s development.
Minn. R. 3525.2550	The team conducts an evaluation for special education purposes within a reasonable time not to exceed 30 school days from the date the district receives parental permission to conduct the evaluation or the expiration of the 14-calendar day parental response time in cases other than initial evaluation, unless a conciliation conference or hearing is requested.

<p>Minn. R. 3525.2710</p> <p>Minn. Stat. § 125A.091</p>	<p>Benton-Stearns Education District conducts full and individual initial evaluation before the initial provision of special education and related services to a pupil. The initial evaluation consists of procedures to determine whether a child is a pupil with a disability that adversely affects the child's educational performance as defined in Minnesota Statutes, section 125A.02, who by reason thereof needs special education and related services, and to determine the educational needs of the pupil. The district proposes to conduct an initial evaluation to determine if the child qualifies as a pupil with a disability obtains informed consent from the parent of the child before the evaluation is conducted. Parental consent for evaluation is not construed as consent for placement for receipt of special education and related services. The District will not override the written refusal of a parent to consent to an initial evaluation or re-evaluation.</p>
<p>Minn. R. 3525.2710, subp. 3</p>	<p>Evaluation Procedures</p> <p>Evaluations and reevaluations are conducted according to the following procedures:</p> <p>A. Benton-Stearns Education District shall provide notice to the parents of the pupil, according to Code of Federal Regulations, title 34, sections 300.500 to 300.505, that describes any evaluation procedures the district proposes to conduct.</p> <p>B. In conducting the evaluation, Benton-Stearns Education District:</p> <p>(1) Uses a variety of evaluation tools and strategies to gather relevant functional and developmental information, including information provided by the parent, that are designed to assist in determining whether the child is a pupil with a disability and the content of the pupil's individualized education program, including information related to enabling the pupil to be involved in and progress in the general curriculum, or for preschool pupils, to participate in appropriate activities;</p> <p>(2) Does not use any single procedure as the sole criterion for determining whether a child is a pupil with a disability or determining an appropriate educational program for the pupil; and</p> <p>(3) Uses technically sound instruments that are designed to assess the relative contribution of cognitive and behavioral factors, in addition to physical or developmental factors.</p> <p>C. Benton-Stearns Education District ensures that:</p> <p>(1) Tests and other evaluation materials used to evaluate a child under this part are selected and administered so as not to be discriminatory on a racial or cultural basis, and are provided and administered in the pupil's native language or other mode of communication, unless it is clearly not feasible to do so;</p> <p>(2) Materials and procedures used to evaluate a child with limited English proficiency are selected and administered to ensure that they measure the extent to which the child</p>

has a disability and needs special education and related services, rather than measure the child's English language skills;

(3) Any standardized tests that are given to the child have been validated for the specific purpose for which they are used, are administered by trained and knowledgeable personnel, and are administered in accordance with any instructions provided by the producer of such tests;

(4) The child is evaluated in all areas of suspected disability, including, if appropriate, health, vision, hearing, social and emotional status, general intelligence, academic performance, communicative status, and motor abilities;

(5) Evaluation tools and strategies that provide relevant information that directly assists persons in determining the educational needs of the pupil are provided;

(6) If an evaluation is not conducted under standard conditions, a description of the extent to which it varied from standard conditions must be included in the evaluation report;

(7) Tests and other evaluation materials include those tailored to evaluate specific areas of educational need and not merely those that are designed to provide a single general intelligence quotient;

(8) Tests are selected and administered so as best to ensure that if a test is administered to a child with impaired sensory, manual, or speaking skills, the test results accurately reflect the child's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the child's impaired sensory, manual, or speaking skills, unless those skills are the factors that the test purports to measure; and

(9) In evaluating each pupil with a disability, the evaluation is sufficiently comprehensive to identify all of the pupil's special education and related service needs, whether or not commonly linked to the disability category in which the pupil has been classified.

D. Upon completion of administration of tests and other evaluation materials, the determination of whether the child is a pupil with a disability as defined in Minnesota Statutes, section 125A.02, shall be made by a team of qualified professionals and the parent of the pupil in accordance with item E, and a copy of the evaluation report and the documentation of determination of eligibility will be given to the parent.

E. In making a determination of eligibility under item D, a child shall not be determined to be a pupil with a disability if the determinant factor for such determination is lack of instruction in reading or math or limited English proficiency, and the child does not otherwise meet eligibility criteria under parts 3525.1325 to 3525.1351.
